A&A 373, 1073–1082 (2001), DOI: 10.1051/0004-10361:20010653

In the radio spectrum of the 14 July 2000 event plotted in Fig. 2 the time axis of the IZMIRAN spectrum (25–100 MHz) contains an error. The corrected figure is reproduced here. The error does not affect the argumentation and conclusion of the paper.

**Fig. 2.** Radio spectra from microwaves to hectometric waves during the 14 July 2000 event. From top to bottom: Ondřejov Observatory (Karlický et al. 2001), Artemis-IV, Thermopylae, Greece (courtesy C. Alissandrakis; Caroubalos et al. 2001), IZMIRAN, WAVES/Wind (courtesy M. Kaiser). Dark shading means bright emission.
