Key words. errata, addenda – galaxies: individual: NGC 253 – galaxies: starburst – stars: early-type – stars: formation
– stars: kinematics

The coordinates of the object discussed in the paper “A bright early-type star in the halo of NGC 253: Runaway or in situ formation?” (A&A, 400, 137) are in error. The actual coordinates are $\alpha(2000) = 0^{\text{h}}48^{\text{m}}05.3^{\text{s}}$, $\delta(2000) = -25^{\circ}17'45''$. Accordingly, the correct denomination of the object following

IAU nomenclature is J004805.3-251745. The object is correctly identified in Fig. 2 of the paper.

The authors wish to express their gratitude to Dr. Ralf Scholz for kindly having pointed out the mistake to them.
