Abstract. The coordinates of Berkeley 73 typed in the paper are wrong. The correct ones are J2000 $\alpha = 06^{\text{h}}22^{\text{m}}05^{\text{s}}$, $\delta = -06^{\circ}18'59''$ ($l = 215.26^{\circ}$, $b = -9.39^{\circ}$). The coordinates in the Galaxy were revised to $X = -13.5$ kpc, $Y = -3.9$ kpc, $Z = -1.1$ kpc, and the distance from the Galactic center $R_{\text{GC}} = 14.1$ kpc. We confirm that the cluster images and colour-magnitude diagrams shown in the paper are indeed from Berkeley 73.

Key words. Galaxy: open clusters and associations: individual: Berkeley 36, Berkeley 73, Biurakan 13 – HR diagram – errata, addenda
