**Key words.** errata, addenda – catalogs – galaxies: spiral – galaxies: irregular – galaxies: photometry – galaxies: statistics

The paper “A catalog of edge-on disk galaxies. From galaxies with a bulge to superthin galaxies” was published in A&A 445, 765 (2006). In the description of the query used to select edge-on galaxies from the Sloan Digital Sky Survey Data Release 1 on page 767 a minus sign was inadvertently omitted. The correct query expression is:

Colors in the range of  $-0.5 < g - r < 2$  mag and  $-0.5 < r - i < 2$  mag.

In the actual query, the correct color term was used throughout, hence the published query results, figures, and tables – including the on-line tables at the CDS – are unaffected by this correction.
