Key words. Sun: activity – Sun: magnetic fields – errata, addenda

We correct three errors which appeared in these closely related papers.

1. In Paper (1), we were primarily interested in the effect of the differential rotation rate $B$ and neglected the difference between the equatorial rotation rate $A$ and the Carrington rotation rate in Eq. (5), which results in a slope in Figs. 3 and 4 that is too steep. This was corrected without comment in Paper (2) and subsequent papers.

2. In Paper (2), Eq. (3) contains a typographical error, with $\Omega_j$ and $\Omega_C$ interchanged. It should read

\[ \Lambda_i = \Lambda_0 + T_C \sum_{j=0}^{N_0} (\Omega_j - \Omega_C). \]

This correct form was used in all numerical work in that paper and all subsequent papers (e.g., Berdyugina et al. 2006, A&A, 445, 703).

3. In Paper (2), the given form of Eq. (6) is incorrect. It should read

\[ \epsilon_{ki} = \min \left( |\tilde{\lambda}_{ki}|; |\tilde{\lambda}_{ki} - 180^\circ|; |\tilde{\lambda}_{ki} - 360^\circ| \right). \]

This correct form was used in all numerical work in that and subsequent papers.
