**Key words.** minor planets, asteroids – comets: general – methods: observational – techniques: spectroscopic – errata, addenda

The spectra printed in the second column of Fig. 1 are the same as in the first column. The corrected figure is reproduced here. The error does not affect the argumentation and conclusions of the paper.

---

\* *Present address:* LESIA, Observatoire de Paris, 92195 Meudon Principal Cedex, France.

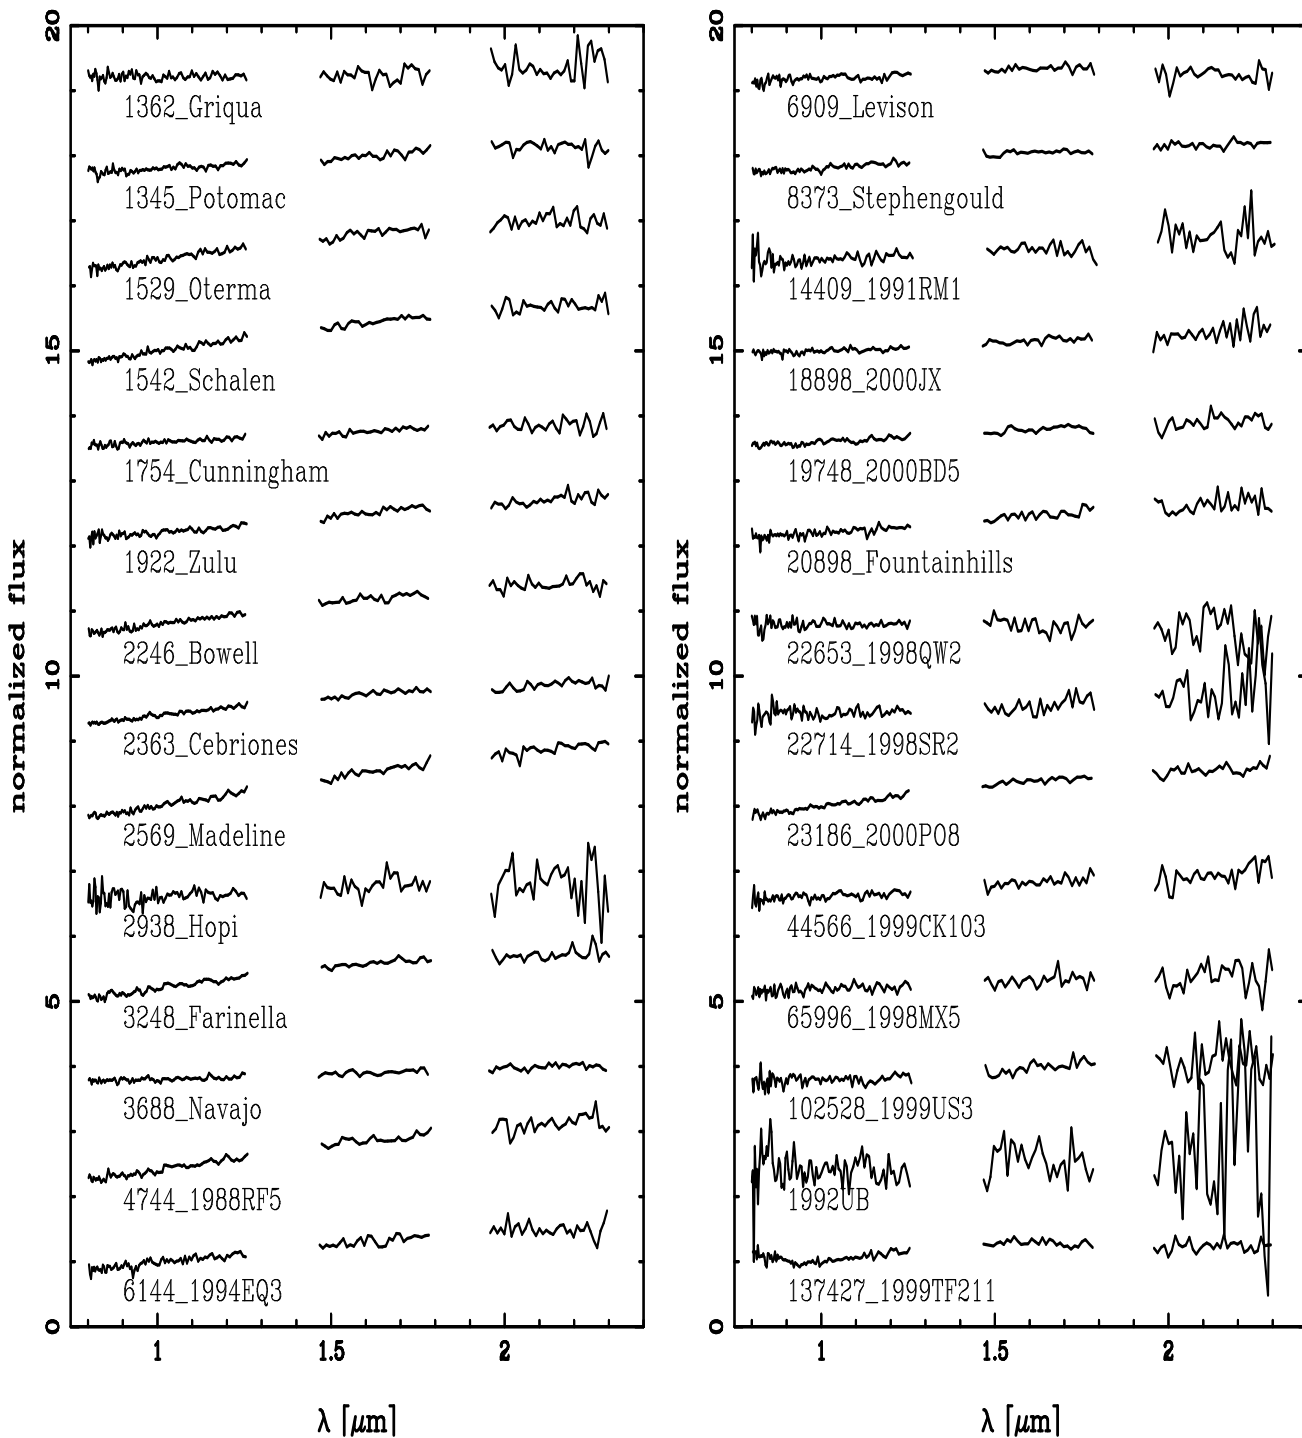

Fig. 1. Near-infrared reflectance spectra of the asteroids, normalized at 1.0  $\mu\text{m}$ . Spectra are shifted in reflectance for clarity.
