Key words. methods: statistical – meteorites, meteors, meteoroids – comets: general – planets and satellites: individual: Mercury – errata, addenda

Figure 4 of the original manuscript shows the velocity distribution curves at Mercury for both asteroidal and cometary sources of dust. The curves and the values in the axis are correct, but the labels are wrong. The right labels are: the velocity of dust particles v on the x -axis and the velocity distribution function $f(v)$ on the y -axis.

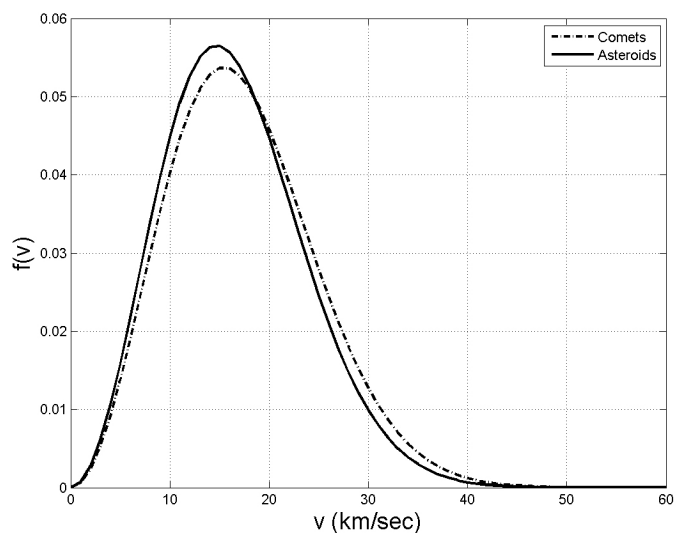

Fig. 4. Velocity distribution of asteroidal and cometary dust particles at Mercury.
