A&A 586, A49 (2016), DOI: [10.1051/0004-6361/201527385](https://doi.org/10.1051/0004-6361/201527385)

Key words. stars: abundances – stars: solar-type – Galaxy: disk – Galaxy: evolution – solar neighborhood – errata, addenda

An error occurred during the production process. Figure 3 published in the original article was wrong. The correct figure is presented here.

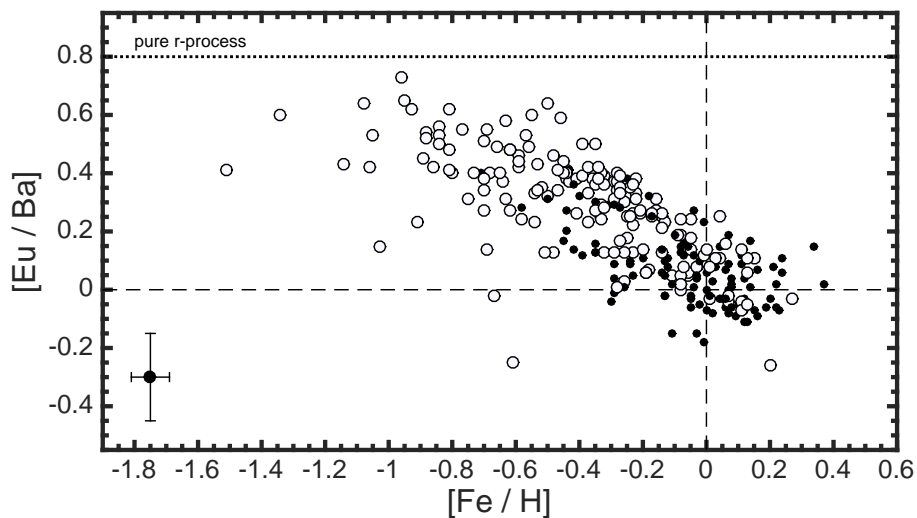

Fig. 3. $[\text{Eu}/\text{Ba}]$ as a function of $[\text{Fe}/\text{H}]$. The full sample is divided into thin and thick disks according to our age-selection criterion. The dotted line represents a pure *r*-process ratio derived from Bisterzo et al. (2014). The average error is also presented.
