**Key words.** polarization – ISM: general – comic background radiation – submillimeter: ISM – errata, addenda

The caption of Fig. 8 had a confusing description of the material shown in the plots. The correct caption together with the figure is given below.

**Fig. 8.** High-resolution power spectra on the LR63 region; simulation vs. data. *From top to bottom:* TE, EE, and BB power spectra of the *Planck* 353 GHz, CMB-corrected maps (red crosses), and one high-resolution ( $N_{\text{side}} = 2048$ ,  $FWHM = 10'$ ) realization of the model (blue squares).
