A&A 628, A58 (2019), <https://doi.org/10.1051/0004-6361/201935430>

Key words. galaxies: halos – galaxies: ISM – galaxies: individual: UGC 7321 – galaxies: kinematics and dynamics – galaxies: spiral – errata, addenda

This is a corrigendum for [Sarkar & Jog \(2019\)](#). A negative sign was inadvertently placed in front of the surface brightness values plotted along the Y -axis in Figs. 9–11. The actual values of surface brightness calculated using Eq. (10) of the paper are positive, and hence the intensity falls at high z , as expected physically. There is no change in the results or conclusions of the paper.

We thank Dmitry Bizyaev for drawing our attention to this mistake.
